### RECENT LEARNING

#### Udemy

##### **React The Complete Guide - 60 hours** (01/2023 – Present)

This is a practice oriented React course where I am using all the latest React 18 features and best practices to build fast reactive web apps. I am diving into all the basic fundamentals as components, props, data binding, hooks, state management and routing.

##### **Key accomplishments:**

Practicing React concepts in an expense tracker application to manage and filter them by year as well as add new expenses as they arise.

#### Udemy

##### **Complete Modern Web Course with JavaScript - 97 hours** (01/2022 – 12/2022)

In this course I learned the fundamentals of the JavaScript programming language and performed several programming logic exercises. I could develop projects using technologies such as JavaScript, HTML, CSS, jQuery, Ajax, Bootstrap, Axios API, Webpack, React, Next.js, Node.js, VS Code, GitHub, relational database (MySQL) and non-relational database (MongoDB).

##### **Key accomplishments:**

I developed my personal landing page portfolio using JavaScript, HTML and CSS.

I built a dynamic sticky notes app doing extensive DOM manipulation to implement the CRUD operations using the browser localStorage as a database.

Building a staff table app I learned how to get data from an API using Axios to create a paginated table where the user can filter, sort and navigate through the data.

I learned CSS grid system and basic React concepts (components and state) to create a reactive calculator app.

Building a YouTube-like app, I could learn how to start to implement a system from a given Figma design and how to use NextJS, Supabase and React Context/Provider to build a componentized interactive CRUD system.
